HOW IT WORKS

Once grouting operations are completed and all residual grout is removed from the pumping system, **AV-284** can be introduced to maintain pump. As a side note, the material may be stored in grouting equipment for extended periods when pump is not in use.

STORAGE

Store in a tightly closed container in a cool, ventilated, dry atmosphere.

NOTE: when exposed to light, **AV-284** can develop a pink/purple-ish color. This color is due to some photochemical sensitive impurities present at very low concentrations and doesn't affect performance of the **AV-284** Pump Wash.

SAFETY

Always use OSHA-approved personal protective equipment (PPE). Refer to the SDS for complete safety precautions. The SDS is available by request or via download at avantigrout.com.
